Home page

While logging in the logo have to be combined like this and moved to header as shared in video

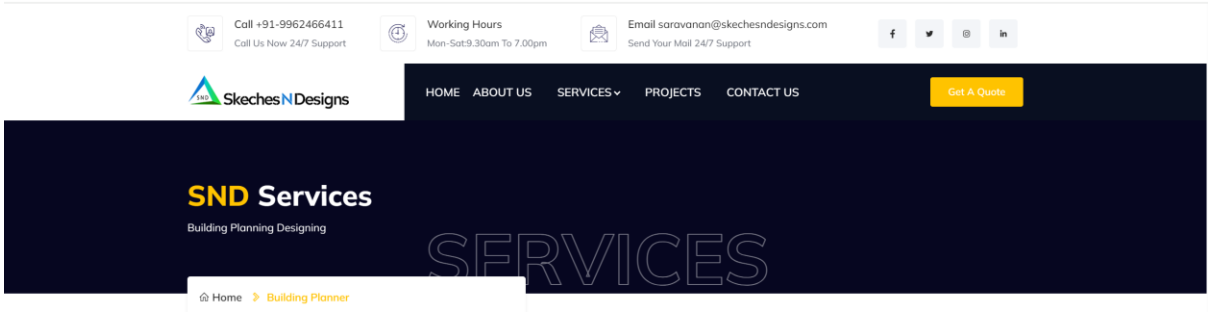
header

(Left side logo

In middle home, about us, service, completed projects, contact us

Right side get a quote) about it our mail id contact info and social media links

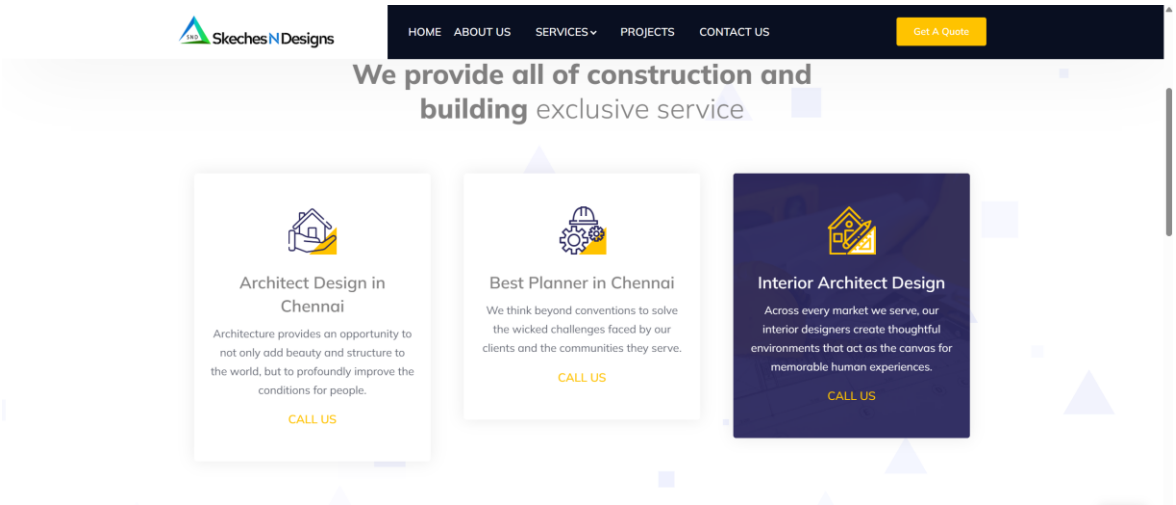
As I attached image



Header should be locked as attached and the home page like this the model should be contents

- Approval drawing
- Structural design
- Architectural 2d plan and 3d elevation
- Laser scanning
- Estimation
- valuation
- Layout
- Interior designs
- MEP Plans
- Construction
- 3d ar and vr service
  While clicking it should move to service page in that service page

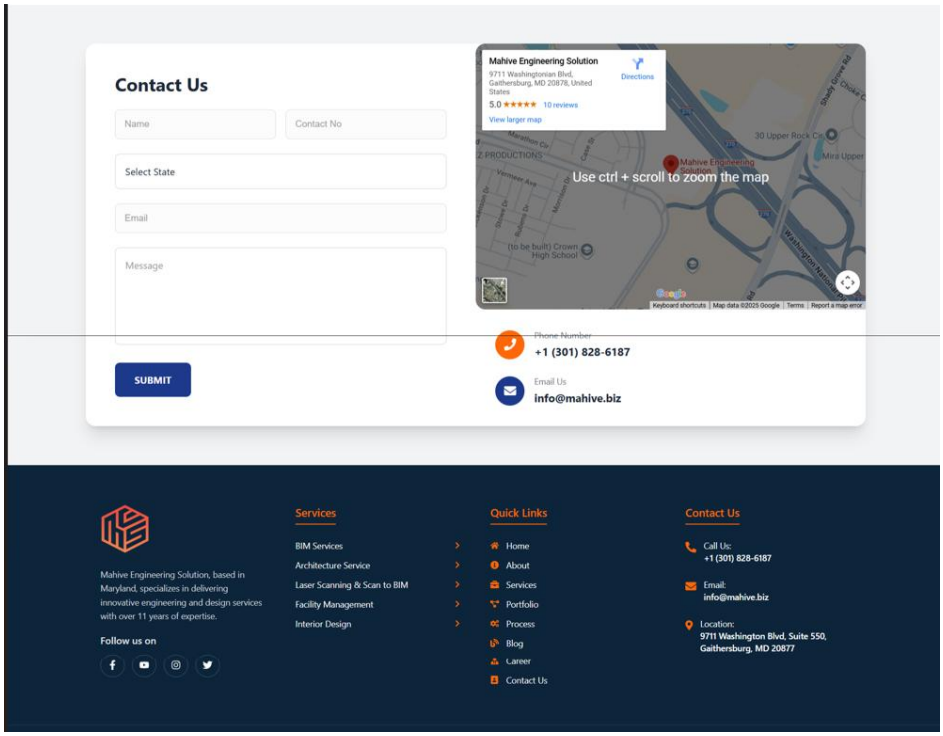
Explanation of the content with images while scrolling down the image should move in the left side the explanation should be stable in right side details of the client



At right side the whats app image should be placed while clicking it the client should move to whats app at lower right side ai tab should guide the client

Below that same like mahive in that name, contact no, state, area, type of service, message below it submit after submitting the details the content explanation should go blind and our social media accounts, location mobile no email should come forward basically the end same as mahive

For construction alone area in sq ft



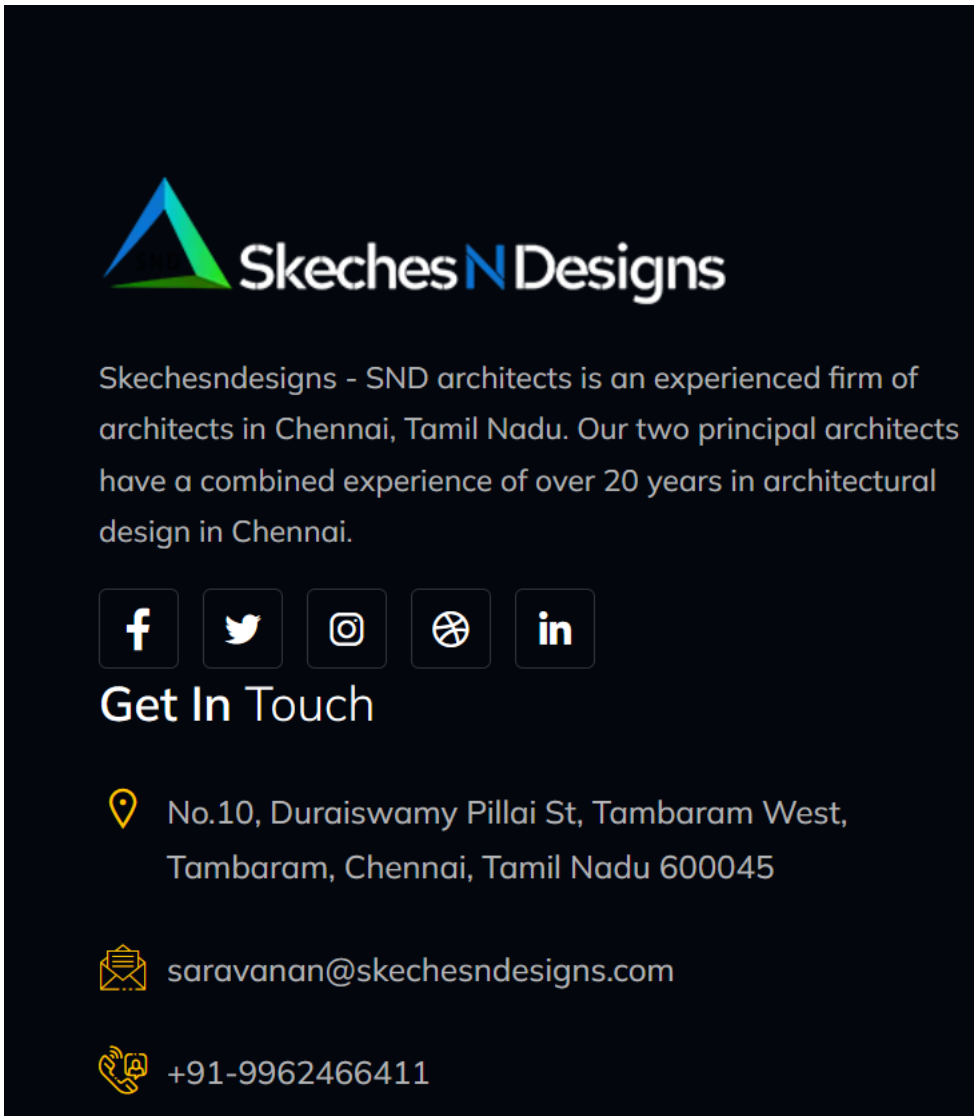
In about us page

Why to choose us

No of project completed

No of customers

Our images

In completed projects the images should be there


In contact us same like entering page logo should pop front and move top left below that our location and in right side like this
